

Report

Special Show

Date: 16-17 January 2016

Place: France, Paris

Breed: Siberian

Color: traditional and colorpoint

Age: from kitten to adult

The quality of the Siberian cats judged during the special show was more than satisfactory. The overall expression is that majority of the cats presented had a high quality of breed features:

Excellent boning, nice head type and wonderful coat texture and condition.

Some cats were not as good. They need more prominence in bone structure and more musculature.

The head of some cats was too narrow in the whisker part, missing the chin. I have mentioned every feature precisely in my show reports for each individual cat, with the recommendations for breeding.

Some cats were not recommended to be used in the breeding program.

As well, I recommended breeders to bring new blood lines from Russia and not be afraid to work on the outbreeding.

As a summary of my visit and judging Siberian cats in Paris, I must say, that I was really surprised by such a high quality of cats and such love that breeders put into breed.

Thanks to Mrs. Cecile Gautier for such an effort in promoting of this wonderful, strong and beautiful breed!
