Condition / Presentation	All is in a E ₀ condition	No.
Global appreciation In the standard / lack of type / oovertype	73 % of all are in E ₀ condition and type with era the standard	27 % need a new blood.

Jorresave

Breeding groups - judgments' overview

- ❖ Global appreciation of quality, homogeneity, etc. of the 3-generations groups
- Notions of transmission / homogeneity / breeding work / breeder's « footprint ».

All cats are in excellent balance, much harmony. All the ears have excellent shape, wide at the base.

3-generations - judgments' overview

- ❖ Global appreciation of quality, homogeneity, evolution, transmission... within the groups
- ❖ - Notions of transmission / evolution / breeding work, lines.

All cats have excellent ears and head shape. Body need to be worked on. The profile has been improved throughout generations.

Veterans - judgments' overview

- ❖ Global appreciations of quality, type, etc. of the veterans
- Notions of breed type's evolution over time, interpretation of the standard / participation in the breeding groups.

Ex body, strong, ex eyes (shape and setting). Cat still need to be standard.

LOOF

General Review

> Specific remarks and focal points against the breed's standard

Some cats need to have stronger and larger body. Some need more inclination in profile and stronger chin. Special attention is to be given to show preparation.

> Comments / General evaluation

Overall quality is very high, good walking and good knowledge of the breed.

> Remarks about the conditions of organization (see ad hoc questionnaire)

(Judgment area, briefing-debriefing area, cats' distribution, show and Best in Show timing)

Judgment area was adequate, the briefing area was adequate and big enough. Show and BIS timing was good. Judgments were well organized. Very few males were shown.
